

Syed Hassan Sibtain

Senior Software Developer | Front-End & Back-End Specialist

Address: Karachi, Pakistan | **Phone:** +92 336 202 4417/+92 342 715 4417

Email: hsibtain18@gmail.com | **Nationality:** Pakistani | **LinkedIn:** [Syed Hassan Sibtain](#)

Summary

Highly skilled Senior Software Developer with extensive experience in front-end and back-end development, specializing in scalable, high-performance solutions. Proficient in modern frameworks such as Angular, React.js, and Node.js, with a proven track record of delivering complex enterprise-grade software products. Adept at collaborating with cross-functional teams to align technical solutions with business goals, mentoring junior developers, and driving process improvements through Agile methodologies.

I am currently available for **Immediate joining**, and seeking opportunities to lead innovative projects, implement cutting-edge technologies, and contribute to organizational success by delivering exceptional user experiences and reliable software solutions.

Experience

Senior Software Developer- 01/2025 to 06/2025

Contour Software (CSI), Remote

- Lead the design, development, and implementation of high-quality, scalable, and maintainable software solutions across various platforms and technologies.
- Work closely with product managers, QA engineers, and stakeholders to ensure software solutions meet business and user requirements.
- Conduct peer code reviews, mentor junior developers, and contribute to improving coding standards and practices within the team.
- Stay updated with emerging technologies and recommend tools and frameworks that enhance productivity and software quality.
- Participate actively in Agile ceremonies, including sprint planning, stand-ups, and retrospectives, ensuring timely delivery of tasks and projects.
- Identify and resolve performance bottlenecks, ensuring efficient application performance and system reliability.

Software Engineer (Front- End- Angular) – 01/2021 to 12/2024

Contour Software (CSI), Remote

- Architect and refine highly interactive user interfaces for enterprise-level platforms using Angular (v7 to v17) and RxJS, delivering robust and scalable solutions.
- Oversee the end-to-end migration of Nexus View from Angular 7 to Angular 12, charting a roadmap to Angular 17, incorporating cutting-edge features to boost performance and simplify maintenance.
- Craft adaptive and visually appealing designs, ensuring seamless cross-device functionality while enhancing accessibility and navigation efficiency.
- Execute in-depth performance diagnostics and apply optimizations, achieving a notable 30% faster load time by leveraging advanced strategies such as lazy loading, modular code splitting, and streamlined API interactions.
- Partner with multidisciplinary teams to conceptualize and implement technical solutions aligned with business objectives, adhering to Agile workflows and iterative development cycles.
- Integrate complex third-party systems, such as Invoice Cloud, to optimize payment workflows, elevate operational efficiency, and improve customer satisfaction.
- Innovate UI styling workflows by incorporating Tailwind CSS alongside Angular Material, modernizing the design system and reducing development cycles.
- Manage source code using Git, enforce version control best practices, and lead comprehensive code reviews to uphold rigorous standards of quality and maintainability.
- Guide and empower junior team members by providing hands-on training in Angular development, design methodologies, and performance tuning.

- Analyze user behavior and feedback to iterate on features and functionalities, ensuring the product evolves to meet changing needs and surpass user expectations.

Key Product Contributions

- Contributed to the development and continuous improvement of the Nexus Product (Nexus View, Nexus Metronic), ensuring its scalability, performance, and alignment with business goals.

Software Engineer (Front- End & Back- End) – 01/2018 to 01/2021

Haball Pvt Ltd, Karachi, Pakistan

- Engineered dynamic, modular applications using Angular (v4 to v14), React.js, and Node.js, enhancing system scalability and performance.
- Refined the SCF Product by creating reusable UI components and implementing lazy loading and resolvers, reducing development time by 35%.
- Spearheaded the creation of the Wissaq platform with Angular 14 and NGRX for state management, optimizing build pipelines and halving deployment time.
- Translated complex Figma designs into responsive React and Angular components, ensuring UI/UX consistency and improving user engagement.
- Designed and implemented RESTful APIs for seamless communication with MySQL databases and banking systems, reducing delays and enhancing data flow.
- Strengthened application security with advanced encryption, authentication protocols, and role-based access, achieving GDPR and InfoSec compliance.
- Optimized MySQL procedures and backend systems, reducing API latency, improving query execution by 40%, and ensuring rapid response times.

Key Product Contributions

- Led the delivery of critical products, including the Payment Suite CTE, SCF Product, and Invoicing System, ensuring their scalability and successful implementation across enterprise clients.

Internship

- **Intern**, Android Developer, Sibisoft Pvt Ltd, Karachi, Pakistan – 05/2016 to 08/2016

Education

- **Bachelor's Degree in Computer Science – 2017**
- National University of Computer and Emerging Sciences (NUCES), Karachi, Pakistan

Skills & Expertise

- | | |
|---|------------------------------------|
| • Angular (Versions 4, 7, 11, 12, 14, 17) | • NGRX |
| • React | • Tailwind |
| • RESTful APIs | • Security Compliance |
| • Bootstrap | • Material UI |
| • Responsive Design (Mobile First) | • Data Encryption |
| • RxJS | • Node.js |
| • Redux | • NextJs |
| • End-to-End Product Migration | • Back-End Integration. |
| • Performance Optimization | • Mentorship & Agile Collaboration |
